FRONTEND DEVELOPER

I'm an experienced web developer specializing in React.js and Next.js. I'm also well-versed in agile project management and DevOps.

PROFESSIONAL EXPERIENCE

Cooperative Bank of Oromia
Associate Digital Officer   **Sep 2022 - Present**

I am currently employed at the Cooperative Bank of Oromia in the Innovation Hub called DxValley. My primary responsibility is to develop interactive and user-friendly front-end web products. At DxValley, we are expected to think creatively and come up with innovative solutions to tackle challenges. I have been involved in various projects here, including Sooqpass and Debo fund.

I played a significant role in the front-end development and successful deployment of Souqpass, which is a Coop product and the first of its kind in Ethiopia. It enables seamless payment processing, integrates a buy-now-pay-later feature, and introduces revenue-based financing. Within the first quarter, we achieved a sharp increase in user engagement and helped many merchants grow their businesses.

As a front-end developer for Debo, I helped develop a platform that allows users to initiate and participate in crowdfunding campaigns. We successfully drove fully funded projects through Debo.

PERSONAL PROJECTS
