Muhidin Misbah Dawud

Senior Full-Stack Engineer

Addis Ababa, Ethiopia (UTC+3) — Remote | misbahmuhidin3@gmail.com | linkedin.com/in/muhidinm | github.com/MuhidinM | muhidinm.vercel.app

SUMMARY

Senior software engineer with 4 years building and running production systems end to end: React and Next.js frontends, backend APIs and database design, and the CI/CD and Kubernetes infrastructure they deploy on. Led the frontend for two national-first lending platforms in Ethiopia (ETB 210M+ disbursed to 4,500+ borrowers), built a multi-tenant fleet platform and a centralised AI media service end to end, and runs Kubernetes and self-hosted CI in production for the bank's HR platform.

EXPERIENCE

Cooperative Bank of Oromia — DxValley

Senior Software Engineer — Payments Platform Innovation 10/2026 – Present

Software Engineer 09/2022 – 10/2026

Addis Ababa, Ethiopia • Digital innovation arm of one of Ethiopia's largest banks

- **CoopScale HR platform:** Own deployment and platform work for the bank's HR system — Kubernetes in production, CI/CD pipelines built from scratch, and self-hosted GitHub Actions runners on a self-managed server, keeping private-repository builds and tests running on a free GitHub organisation.
- **Michu Mizan:** Led frontend development for Ethiopia's first interest-free (Shariah-compliant) digital financing platform, now used to disburse ETB 60M+ in capital to 1,500+ customers.
- **Souqpass:** Co-built the frontend, in a two-engineer team, for Ethiopia's first revenue-based financing platform — ETB 150M+ funded to 3,000+ small businesses, now the primary financing tool for the country's agricultural sector.
- **Zakat & Awqaf platform:** Building Ethiopia's national zakat and waqf platform with the Zakat and Awqaf Commission — donor flows and the multi-level admin console on the frontend, plus the CI/CD pipeline deploying it to VMs. In development.

VK Tech

Frontend Engineer (Contract) 03/2025 – Present

Remote — Beijing, China • AI product studio: consumer AI tools plus B2B SaaS platforms

- **Fleet OS:** Built the multi-tenant platform for independent taxi fleets end to end — tenant-scoped database schema, APIs, and role-based auth behind dashboards for leased-vehicle management, driver assignment, and routing.
- **AIGC API:** Engineered a centralised backend service that handles and standardises AI image and video generation requests across the product suite, replacing per-product integrations.
- **Charge Hub:** Built the operator console for a B2B EV charging platform — real-time charger control over unreliable networks, using confirmation-gated UI state and idempotent commands to stop double-triggered chargers and billing drift.
- **AI SaaS suite:** Scaled a portfolio of 20+ consumer AI tools to 150K+ users, owning the Next.js rendering strategy (SSR/ISR) that sustained 95+ Lighthouse and technical-SEO scores as the surface grew.

Keradion

Frontend Engineer (Contract) 01/2025 – 03/2025

Addis Ababa, Ethiopia

- Next.js product showcase for Omicron, Ethiopia's exclusive Chint distributor, and the mobile-first frontend for Eyoha, a community platform.

TECHNICAL SKILLS

Frontend: TypeScript, React, Next.js (App Router, SSR/ISR), TanStack Query, Zustand, Redux Toolkit, Tailwind CSS

Backend: Node.js, NestJS, Java, Spring Boot, REST APIs, GraphQL, auth and role-based authorisation, background jobs

Data & caching: PostgreSQL, MySQL, MongoDB, Redis, Supabase, Firebase, relational schema design

Testing & observability: Playwright, Prometheus, Grafana, Sentry

Infrastructure: Kubernetes (production), Docker, GitHub Actions incl. self-hosted runners, Linux VMs, AWS, Cloudflare, Vercel

EDUCATION & CERTIFICATION

B.Sc. Computer Science and Engineering, 2022 — Adama Science and Technology University, Ethiopia

DevOps, Cloud, and Agile Foundations Specialization — IBM (Coursera)
